

Welcome

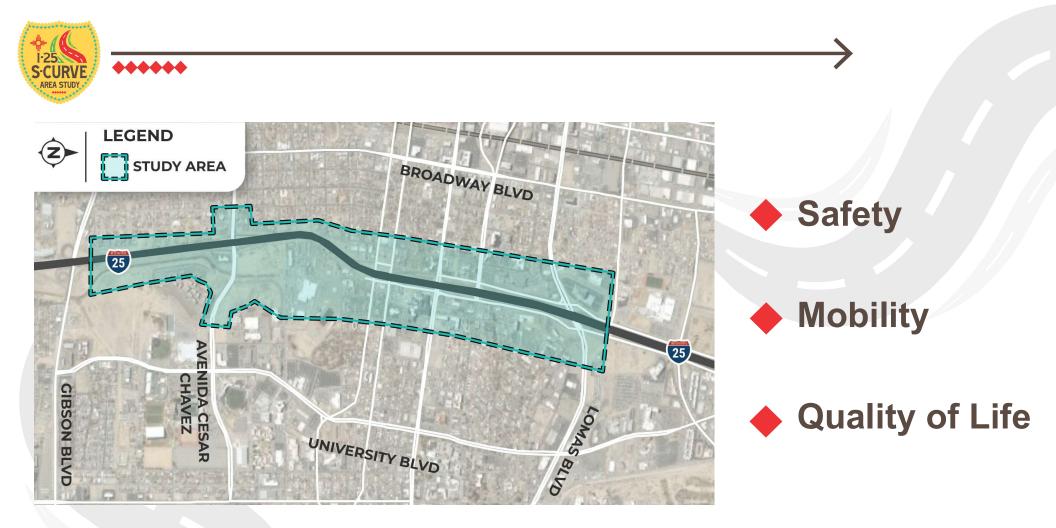

A presentation will begin around 5:30 p.m., followed by a Q&A.

Si necesita traducción al español, diríjase a la entrada para obtener un auricular para interpretación en vivo.

The presentation will be about 40 minutes and will be recorded and made available on the study website.

Welcome Packet

Topics Covered

- Public Input from Spring 2024
- Common Questions and Responses
- Where Are We Now
- Level 2A Screening
- Refined Options Advanced
- Includes Copy of Survey

Thank you for attending the public meeting for the I-25 S-Curve Area Study. This packet includes information from the last comment period and how we, the study team, got to the alternatives. The presentation will be focused on reviewing the Build and No-Build Alternatives and the screening process.

We have analyzed the data for this corridor and are recommending advancing transportation solutions that improves safety, mobility, and quality of life for all users.

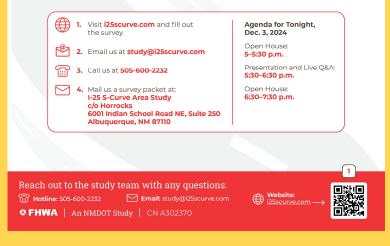

A survey is provided at the end of this packet to submit your feedback. This packet is also available on our website at **i25scurve.com** if you

prefer to read it online.

After this public comment period, the team will refine the recommendation and complete the environment document before moving to design and construction.

Please hand in your survey before you leave tonight or submit by Jan. 6, 2025, in one of the following ways:

© FHWA

NMDOT Responsibility

- At the NMDOT, we are responsible to provide safe infrastructure on all state and federal highways throughout New Mexico.
- It is important to consider all options equally as you review all the build alternatives.
- We are recommending to advance two transportation alternatives that improve safety, mobility, and quality of life for all users for further consideration.

No-Build Alternative

Information located at Station 1 & 2.

What Does a No-Build Mean?

The "no-build" alternative is always included as a benchmark against which the impacts of other alternatives can be compared. As part of the no-build alternative, short-term minor reconstruction, such as safety upgrading and maintenance, can be considered.

- Federal Highway Administration (FHWA)

What Is <u>Not</u> Included?

New biking or walking facilities

Noise abatement like noise walls

Better access to and from I-25

A No-Build Alternative would only replace the existing infrastructure, like bridges or pavement.

How would a No-Build Alternative be constructed if selected?

Aging infrastructure would be replaced in multiple projects as the infrastructure condition deteriorates.

Construction impacts should be expected no matter the alternative selected.

Construction timing would be unknown until funding is identified.

© FHWA

What happens if we do nothing?

Substantial increase in:

- Travel times to destinations
- Commute time on I-25
- Crashes
- Local road network congestion

What would my commute on northbound I-25 look like in the morning?

Rio Bravo to Big-I

Today	5.3 min.	N/A			
2050		4.6 min.	4.9 min.	4.6 min.	4.7 min.

© FHWA

Compared to the No-Build Alternative in 2050, each Build Alternative substantially reduces crashes:

Alternative J 50% Reduction

Alternative L 42% Reduction

Data was calculated using the Highway Safety Manual predictive crash method.

2 FHWA

The No-Build Alternative does not meet the study's Purpose and Need.

The No-Build Alternative will be carried forward as a benchmark against which the impacts of other alternatives can be compared.

Build Alternatives

Information located at Station 1 & 2.

.....

Nonmotorized Transportation On All Build Alternatives

Refined Cross-Section 2024 – Phase 1B Recommendations

On all cross streets at I-25 and on both sides of the roadway

Locust Street between Dr. Martin Luther King Jr. Avenue and Gold Avenue

© FHWA

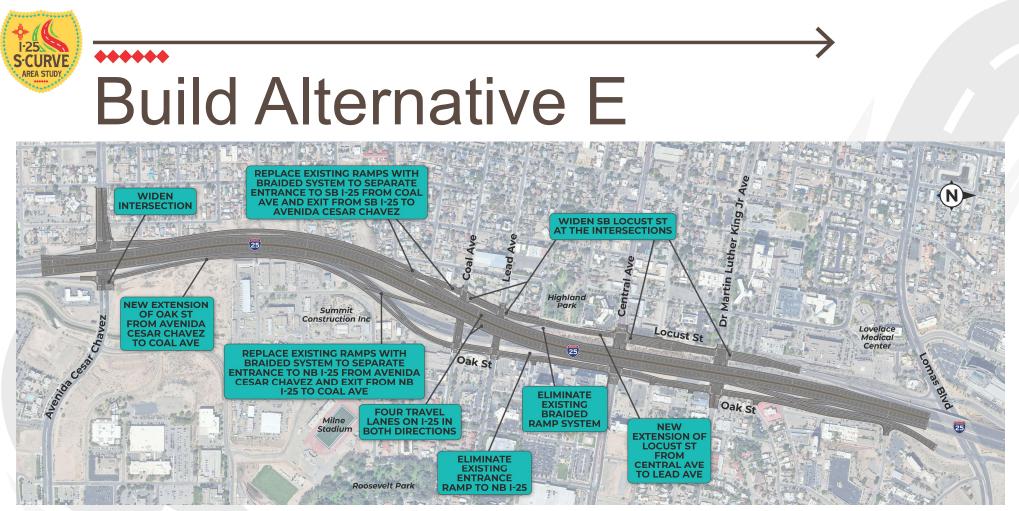

How should a user get from the barrierseparated shared-use path to existing CABQ facilities?

- Crosswalks
- Bike boxes
- Widen path through intersection

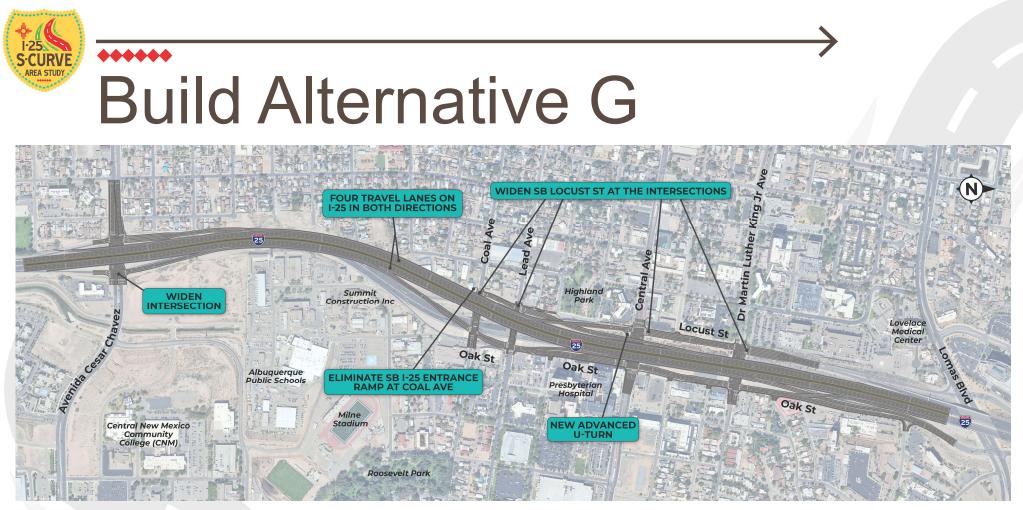

We need your ideas!

Information located at Station 4.

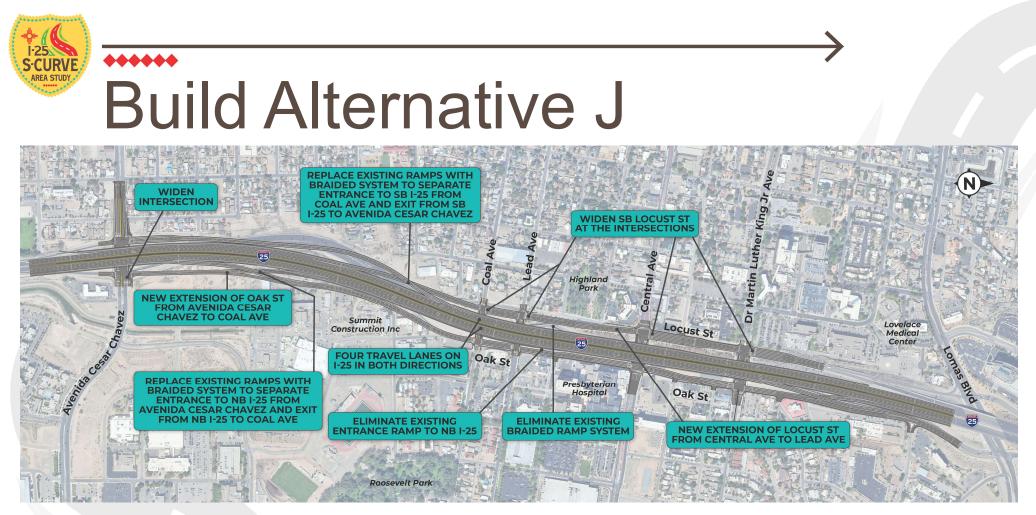

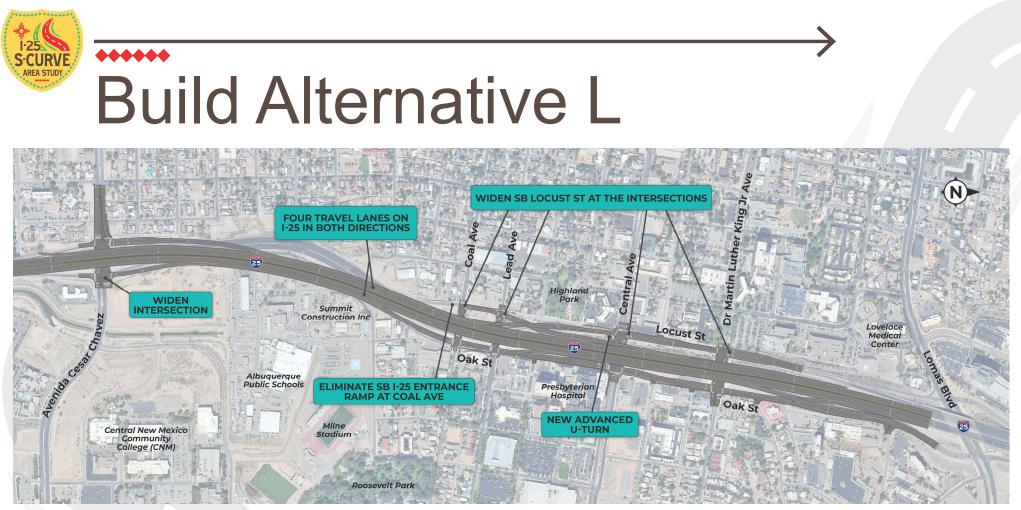

Build alternative designs are subject to change through the study process.

Build alternative designs are subject to change through the study process.

Level 2B Screening Purpose & Need Analysis

Information located at Station 2.

Measures of Effectiveness

Reduce crashes

Reduce average delay

Increase average speed

Reduce average travel time

Replace aging infrastructure

Improve nonmotorized transportation

Does the alternative sufficiently address Purpose and Need?

© FHWA

Takeaways

	Alternatives

Level 2B Screening Cumulative Impact Analysis

Information located at Station 5.

Resources

Neighborhood/residential impacts

Non-residential impacts

Noise mitigation

Nonmotorized transportation impacts

Impacts to minority and low-income populations

Cumulative impact to the surrounding community

Takeaways

		Alternatives		
No-Build	E	G	J	L
No opportunities to improve upon past impacts, including evaluating noise walls or providing nonmotorized transportation facilities across I-25.	Additional impacts to neighborhoods and residents, non-residential buildings, and minority and low- income populations, and likely increased noise levels (moving I-25 closer to residential properties). Provides opportunity to improve nonmotorized transportation facilities across I-25.		No additional residential relocations or impacts to minority and low-income populations. Additional impacts to non-residential buildings. Provides opportunity to improve nonmotorized transportation facilities across I-25 and would likely decrease noise levels (moving I-25 away from residential properties).

No-Build Alternative will be carried forward as a benchmark against which the impacts of other alternatives can be compared.

Build Alternative J

© FHWA

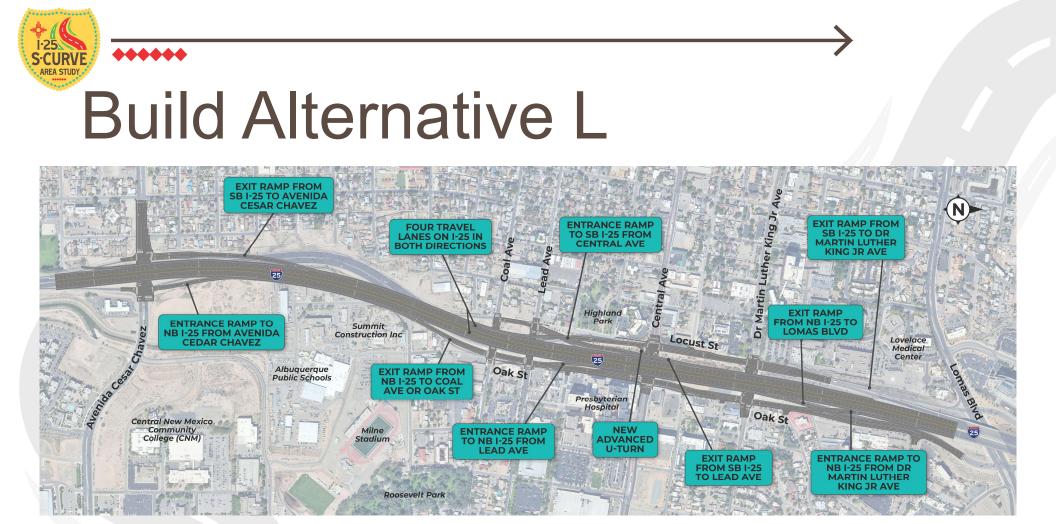

Build Alternative J

Meets the Purpose and Need

while minimizing impacts to environment and community resources.

- No residential relocations
- Highest number of nonresidential relocations
- Lowest number of impacts to historic buildings, Section 4(f) properties.
- Minimal impacts to neighborhood blocks with underserved communities (minor strip acquisitions)

© FHWA

© FHWA

Build Alternative L

Meets the Purpose and Need

while minimizing impacts to environment and community resources.

- No residential relocations
- Lowest number of nonresidential relocations
- Lowest number of impacts to historic buildings, Section 4(f) properties.
- Minimal impacts to neighborhood blocks with underserved communities (minor strip acquisitions)

1. What feedback do you have on the No-Build and Build Alternatives?

Not applicable

2. Did the screening process presented by the team make sense? Please explain.

3. Was the material shared easy to understand?

□ Strongly agree □ Agree

Strongly disagree

4. What input do you have on the nonmotorized elements included in the Build Alternatives?

Disagree

Neutral

5. What do you think about the recommended advancing alternatives (Build Alternative J and Build Alternative L)? To see maps of the alternatives, please visit i25scurve.com.

Thank you for your input

Comment period closes Jan. 6, 2025

Please email comments to study@i25scurve.com or mail to 6001 Indian School Road NE, Suite 250, Albuquerque, NM 87110.

A comment is not a vote on whether the recommendations will be implemented. Diverse perspectives and values from you and your neighbors are critical to ensure that better-informed decisions are able to be made. When possible, provide specific examples of issues and concerns and share your ideas and solutions.

Yes

No

How to Submit Public Comments

- 1. Submit today, in person, via the survey or Q&A
- 2. Visit i25scurve.com and fill out the survey (posted Dec. 4, 2024)
- 3. Email us at study@i25scurve.com
- 4. Call us at 505-600-2232
- 5. Mail us a comment form at:

I-25 S-Curve Area Study c/o Horrocks 6001 Indian School Road NE, Suite 250 Albuquerque, NM 87110

Comment period open through Jan. 6, 2025!

Questions

Q&A Guidelines

- Keep questions to one minute
- State your Q&A number that was provided prior to your question
- Be respectful of the attendee asking the question and of the team answering it
